Configurator: Apple TV Proxy Profile

This document details a configuration for Apple TVs with proxy information.

1	Plug the POWER cable into your Apple TV, then connect the micro-USB cable to your Apple TV and your computer. In Apple Configurator this screen will appear:  Select **Don't enroll** and then click next
2	 Next, choose **Erase and install latest version** and then click next.

3	 Name your Apple TV, choose your language and click **Next**.
4	Click New... to create a new configuration profile.  Click on **General** and enter desired details. This will name the profile (which will be used for all school Apple TVs).

5	Next go to **Global HTTP Proxy** and then click configure 6	Proxy Type: Manual  Enter proxy URL, e.g. proxy.det.nsw.edu.au : 8080 Network username and password.
7	Or choose auto and enter PAC URL. 
8	If you will be using the Apple TV on Wifi and not ethernet, click on **Wifi** from the left menu and select **Configure**. 9	Add wifi details... 10	Then, click on 11	Now tick next to the profile you just created and then click **Next**.

12	 Review your configuration settings and then click **Configure**.
13	 The device configuration can take some time. Wait for the configuration to complete.

14	 When complete, Configurator will ask you to do the following actions: 1. Disconnect the USB cable. 2. Disconnect the power cable. 3. Reconnect the power cable. 4. Wait for the status light to stop blinking. 5. Reconnect the USB cable.
15	 When reconnected to the computer (make sure you plug the USB cable into the computer and THEN to the back of the Apple TV), the final configuration settings will be applied...

16	 Then the process will be complete. Click **close**, disconnect from your computer and begin using your Apple TV.
17	Please note, for the process to be successful you need to follow these steps on the network you intend to apply the settings to. i.e. don't try applying school settings at home. www.daveict.com
